About Waston Chem

Changzhou waston chemical technology Co.,Ltd is a global distributor&custom manufacturer which is located in Changzhou Jiangsu and owns three production sites in Jiangsu, Shandong and Jiangxi province. Waston chem engaged in the research, production and sales of naphthalene intermediates, bisphenol intermediates and other function monomer Intermediates for several years.

Depending on the strict management and certificated by the Chinese official Waston chem is also a professional importer&exporter of hazardous material and toxic chemicals.

Our quality assurance and distribution systems provide customers with price-competitive and safe-to-use raw materials from China.

Introduction To The Factory

We are holding Co-production plant of 1-Naphthol for 8000MT/year and 2-naphthol for 10000MT/year. Which was designed with leading technology. Our products are extensive used for agrochemical and dye chemicals relies on it's low smell,high purity.

The product adopts domestic advanced technology, with low odor and low impurity. The products are sold at home and abroad as important intermediates of pesticides and dyestuffs.

With our advantage of abundant raw materials, we have also developed series products such as Binaphthol, N.W acid and 1, 4 acid& ect.

The factory has two set of automatic distillation towers and more than 200 sets of 500-10000L reactors. With DCS automatic linkage control, we have basically realized the automation of production control.
